

Expand Project Possibilities: Leankor and the Power of Salesforce

Salesforce is world renowned for its ability to change the way organizations do business. Recognized as the platform as a service (PaaS) market leader, Salesforce digitally interconnects everything a company needs for a complete 360 customer-centric view.

Natively built on the highly trusted and secure Salesforce platform, Leankor is an enterprise work and project management solution designed to help enterprises solve the challenges that come along with complex, large-scale projects. Leankor is a comprehensive solution that streamlines organizational workflows and processes through real-time, proactive management and collaboration.

Integrated for Optimal Performance

Leankor allows organizations to expand their use of powerful Salesforce applications creating enterprise functionality and an unmatched work and project management solution. These extended integrations allow for real-time collaboration and connection, accurate and up-to-date data, powerful applications for analytics and the flexibility to easily scale and to work from anywhere, at any time.

Field Service Management

Leankor empowers employees to deliver intelligent and connected customer service using Field Service Management (FSM). The FSM software helps users perform a variety of important tasks no matter where they are located. FSM is packed with features like document management, routing services, price quoting, articles, inventory and stock statuses, barcode scanning and much more.

QUIP

Leankor integrates with Quip to extend all team and individual collaboration in one space. QUIP allows groups of people to securely, and in real time, create, edit and share documents, spreadsheets and chat. Drive collaboration and get the whole team on the same page, with the same information, every day.

CPQ

Leankor innovates the ability to configure, price and quote with Salesforce's CPQ software. Reduce the time needed to generate accurate quotes, fewer errors, and more time for business development all leading to better client service.

Tableau

Leankor harnesses the power of data through the extension of Tableau. In order to use data to successfully drive business forward, it must be properly analyzed. Tableau helps users understand the power of their data. They area also able to manage multiple complex factors all at once, in real time as well as optimize inventory, streamline logistics and deliver on time, every time.

Community Cloud

Leankor utilizes Community Cloud, Salesforce Mobile, to extend management capabilities to users outside the traditional office. Create personalized portals to allow workers to securely access data and perform their work on any device, at any time. Now individuals can check their dashboards or review notes while they are traveling, are working offsite or before they walk into a meeting.

Einstein AI

Leankor leverages artificial intelligence by integrating with Salesforce Einstein AI. Einstein AI learns, self-tunes and gets more astute with every interaction and data input. This AI embeds into everyday business by predicting future behavior, discovering relevant insights and automating tasks.

MuleSoft

Leankor employs MuleSoft for third party integrations, helping companies turn their APIs into an instrument for digital transformation. Using MuleSoft, organizations can build their strategy and manage the full API lifecycle.

Sales, Service and Government Cloud

Leankor integrates with Sales Cloud, Service Cloud and Government Cloud to drive better outcomes and provide deeper project insight. Built on the same platform, users can see full project data without ever leaving the application and rapidly respond to project requests. Teams can also automate basic processes while capturing data that can be used for KPIs.

Transform now at leankor.com

Leankor is a highly visual work and project management solution built on the Salesforce Cloud. Designed for the enterprise customer, Leankor helps companies execute complex projects at scale. A transformative solution, it links different styles of methodologies and processes, empowering people to work more effectively. Leankor enables teams to organize, manage, collaborate, and deliver better projects, helps decision-makers measure effectiveness and allows companies to deliver quicker revenue cycles. Leveraging the power of Salesforce, it brings together customer, project, and resource data extending the Customer 360 vision. Leankor is used by many of the world's leading brands with focused solutions for industrial enterprises in Manufacturing, Construction, Solar, Energy and B2B Telecom with additional emphasis on R&D, quality management, product launches and manufacturing for Biotech, Medtech and Pharma.
