

Comprehensive Work and Project Management

Gain the Features You Need to Operate Enterprise Projects from Order to Delivery.

Leankor is a dynamic, flexible and user-friendly SaaS enterprise work and project management solution designed around the specific and unique needs of enterprise customers. Securely hosted in the Salesforce Cloud, enterprise organizations can now apply a 360 customer-centric view of all complex, large-scale projects, resulting in increased efficiency and on-time delivery.

Gain Enterprise Sized Results

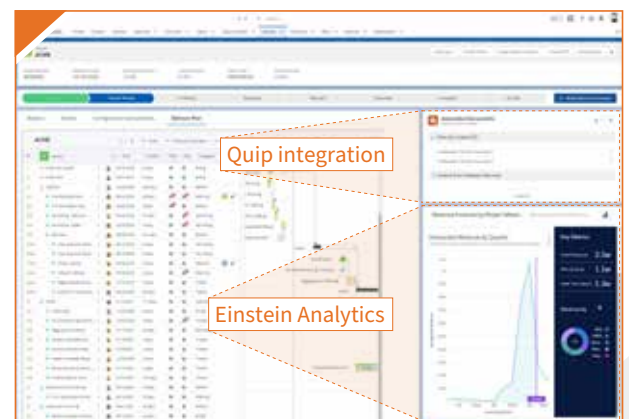

Speed up digital transformation by simplifying project management and empowering people to do their best work. Leankor helps organizations accelerate project delivery through centralized customer and project information and streamlined processes and workflows. Providing complete transparency into all project information, users can easily find change requests and critical project information including financials, correspondence, data, resources, workloads and up-to-date information on deliverables and interdependencies. Every user works off the same, accurate information for healthier, more stable projects.

Powerful Salesforce Integrations

Leverage the power and security of the Salesforce platform for every aspect of your work and project management. One of the world's most trusted and reliable cloud platforms, Salesforce offers enterprise rich functionality to customers. Their extended integrations allow for real-time collaboration and connection, accurate and up-to-date data, powerful applications for analytics and the flexibility to easily scale and to work from anywhere, at any time.

Natively built on the Salesforce platform, Leankor allows organizations to expand their use of powerful Salesforce applications creating enterprise functionality and an unmatched work and project management solution. Leankor clients have opportunities to use best in class applications, including: Einstein AI, Tableau, Service Cloud, Sales Cloud, Community Cloud, CPQ, Order Management, Field Service Management, QUIP, Mulesoft and more.

Adaptable Project Methodologies

Interconnect your work methodologies for seamless workflows. Leankor enables users to work the way they work best by adapting and translating work styles for enhanced efficiency, whether that be Kanban, Lean, Pull-Planning, Last Planner, Wave, Agile, Gantt, Waterfall, hybrid or something else.

Innovative Portfolio Management

Achieve a full 360-view and complete transparency into all projects across the organization. Leankor allows executives to roll-up all projects into one master, control tower view. This includes all customer data, up-to-date project information, resource availability, detailed project reporting and all correspondence.

Intuitive and Visual User Interface

Utilize one of the most user-friendly and visual interfaces in work and project management. Leankor is designed for users of all technical capabilities but can still handle the most advanced projects. This more instinctual user experience allows for faster expansion and adoption, preventing costly operational inefficiencies.

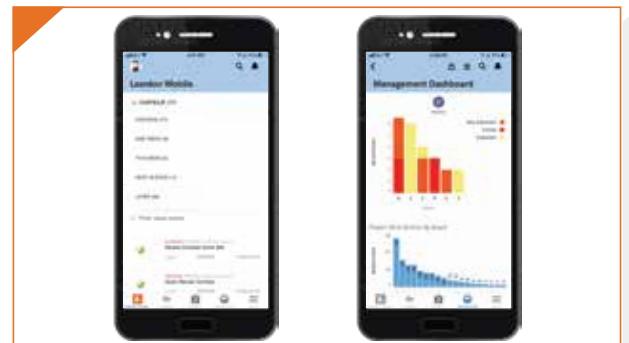

Collaborative Work Management

Join internal teams wherever they are located for in the moment, virtual, collaborative discussions and brainstorming sessions. Leankor also links internal workers to customers, contractors, vendors and installation partners, allowing them to interact in real time. Integrated Salesforce Chatter allows communication directly into workflows to ensure project relevant conversations are not lost.

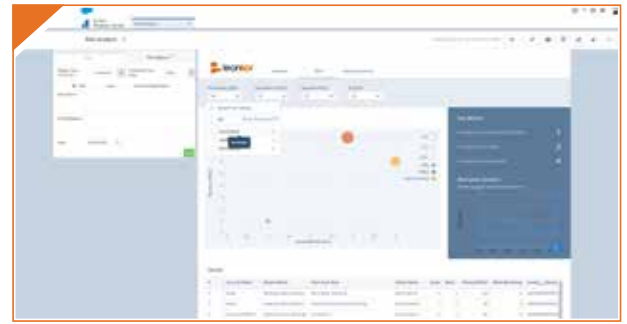

Seamless Remote Working

Benefit from the ability to work no matter where teams are located. Leankor uses Salesforce Mobile to support the modern, remote workforce. Whether users are in the office, on the way to the airport, working from home or visiting a site, they can keep work continuity using the Leankor mobile app.

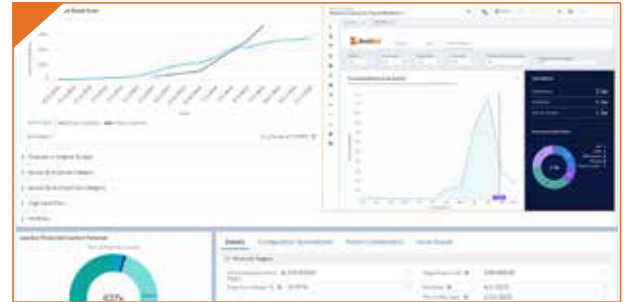

Reliable Risk Surveillance and Management

Identify risks and gaps before they happen. Leankor's 360-view, coupled with continuously updated data, allows for the ability to prevent or circumvent project risks. Risks can be found anywhere and often affect the entire project chain and lifecycle. Leankor helps mitigate risks and rework that cause organizations to waste resources, time and money.

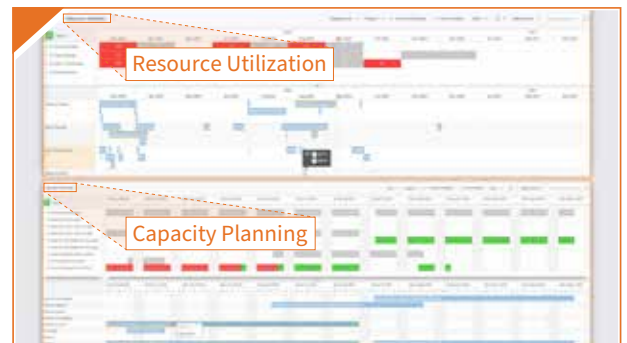

Insightful Financial and Cost Management

Manage project budgets, costs, cash flows and margins with ease. Leankor provides detailed and precise insight into all financials from order to delivery, allowing managers to access and assess reliable financial information at any time.

Real-Time Resource Management

Anticipate and plan for all resource needs now or in the future. Leankor's dynamic resource management capabilities give transparency, clarity and visibility into planning projects. Up-to-date data allows for accurate insights into individual, departments and project workloads for resource utilization and scheduling.

Intuitive Life Cycle Task Management

Monitor and report on task progress with ease. Leankor sends real-time alerts to cross-functional teams when tasks are completed and new tasks are required, eliminating time delays from miscommunication. Users can also clone cards and projects for a simplified workflow.

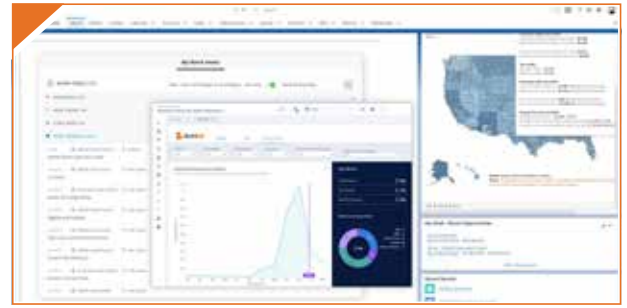

Dynamic Personalized Dashboards

Access "My Work", a personalized dashboard that provides users a simple and effective way of managing their work queue. Leankor helps individuals see progress of their daily and upcoming work in an intuitive dashboard view. Users can easily update assigned work as it is completed, move it or modify it.

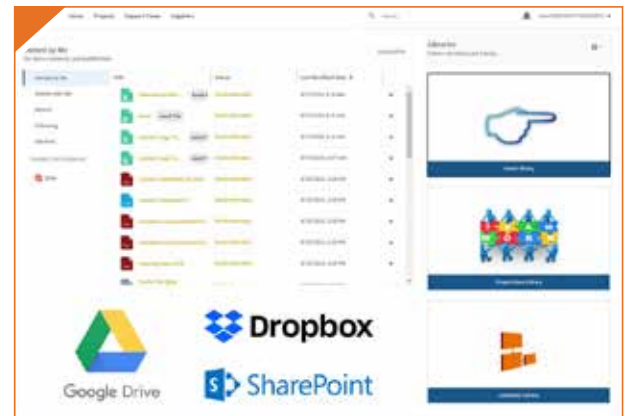

Optimized Reporting and Analytics

Enhance customer data and information to drive the best project results. Leankor integrates with Salesforce's Einstein AI and Tableau to help users get the most out of their data. Einstein AI embeds into an organizations' everyday business by predicting future behavior, discovering relevant insights and automating tasks. While Tableau helps users understand the power of their data. This power combination creates unparalleled results.

Detailed Document Management

Sync and share all project files in one place. Leankor records all information needed for any type of project. Organizations can eliminate use of disconnected spreadsheets that may contain incorrect, outdated information. Users can quickly find what they are looking for in a moment's notice and securely share, edit, discuss and publish files as needed.

Transform now at leankor.com

Leankor is a highly visual work and project management solution built on the Salesforce Cloud. Designed for the enterprise customer, Leankor helps companies execute complex projects at scale. A transformative solution, it links different styles of methodologies and processes, empowering people to work more effectively.
